

Certified Plant Engineer

The Association for Facilities Engineering (AFE) is a professional membership organization serving all professionals working in the built environment. Just as in social science, AFE defines the term built environment as the surroundings people construct to provide settings for human **activity** and interaction, ranging in scale from buildings to parks, often including their supporting infrastructure such as water supply and energy networks.

As the leading technical education and credentialing resource for facilities management professionals, we want to make sure you have a competitive advantage over other professionals in your field. According to the US Dept. of Labor, only about 8% of facilities professionals hold any type of certification. Distinguish yourself from the crowd with a well established & recognized certificate from AFE.

Core Topics:

Electrical Engineering
Mechanical Engineering
Civil Engineering
Heating, Ventilation & Air Conditioning + Refrigeration (HVAC&R)
Energy
Environmental Engineering
Controls & Instrumentation
Management
Economics
Maintenance
OSHA Safety

The Certified Plant Engineer Certificate

Certified Plant Engineer (CPE) Eligibility:

Category A, minimum of 4 years in management in plant/facility engineering (or) 6 years of work experience in field overall with a 4-yr degree in engineering, architecture or related field. If you do not have a qualifying degree, you must have a minimum of 6 years in management in plant/facility engineering (OR) 8 years of work experience in field overall.

Category B, minimum of 4 years of experience as a registered professional engineer (PE). Category B, applicants are exempt from the exam module you are already licensed in (only have to pay for certification & obtain 8 CEUs in 3 years).

To assist you or your employees/colleagues with obtaining the CEUs, we will give them a FREE year of AFE membership once they have passed the exam.

Pricing

CPE Live review course (Certified Instructor): Non-Member: \$2500 AFE Member: \$2200

CPE Self study (Study exam materials & take exam within a year, using a proctor from your employer's human resources): \$910

If you have 5 or more professionals attend: 10% off

Benefits of having a certification with AFE:

- You **could potentially earn** more than other professionals in your position
- Certification enhances job security even in tough economic times
- Demonstrates to upper management a commitment to your career and to the company
- An AFE Certification highlights your experience and expertise in the industry

- AFE certifications provide a benchmark of skills and knowledge in many critical areas, from predictive maintenance to safety and indoor air quality
- Consistent training in maintenance topic saves the department and company money
- We are highly regarded by public sectors (Dept. of State & Dept. of Defense) & well-known facilities corporations (ARAMARK, CBRE, EMCOR, & Cintas).
